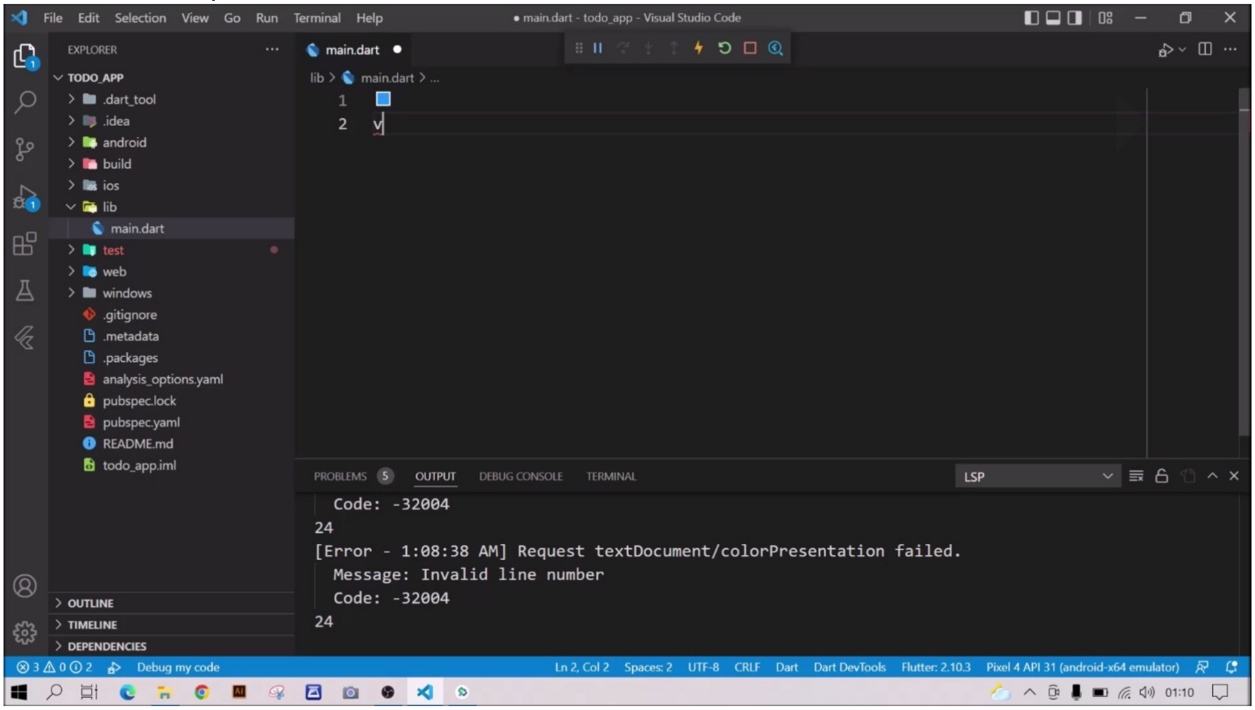
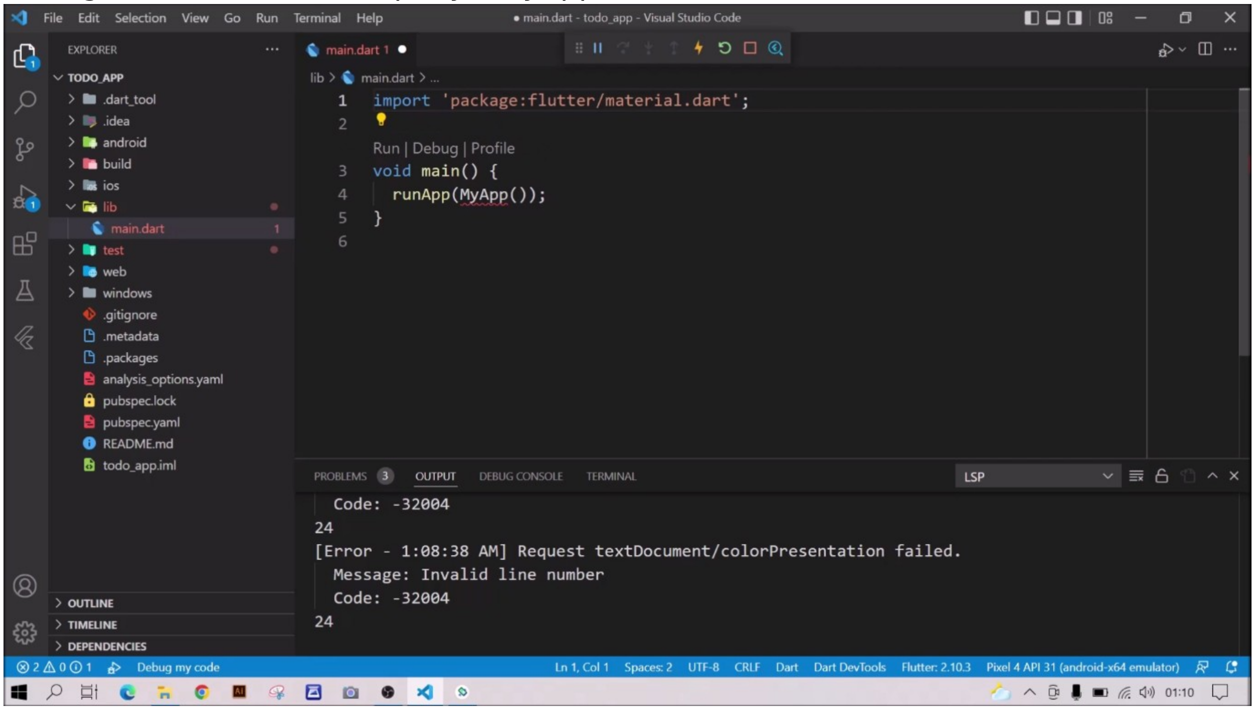
Membuat tampilan awal



Lalu jalan kan void main

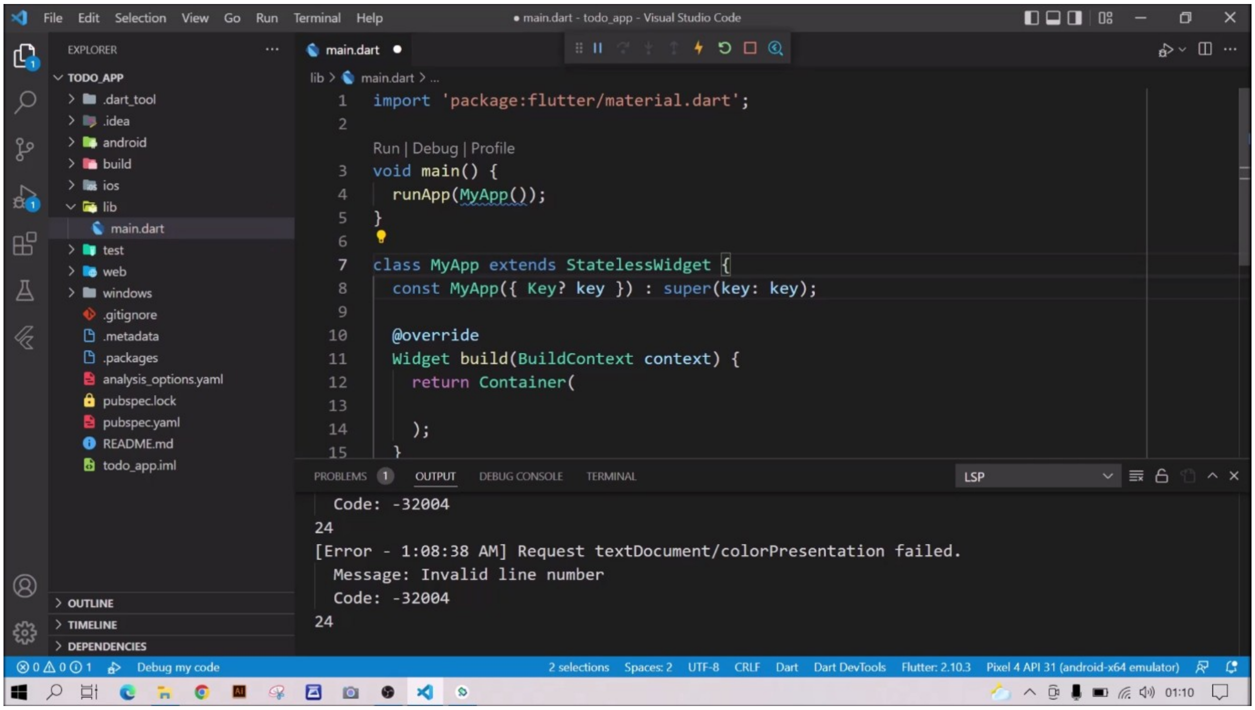
Buat gini terus kita belum punya myApp



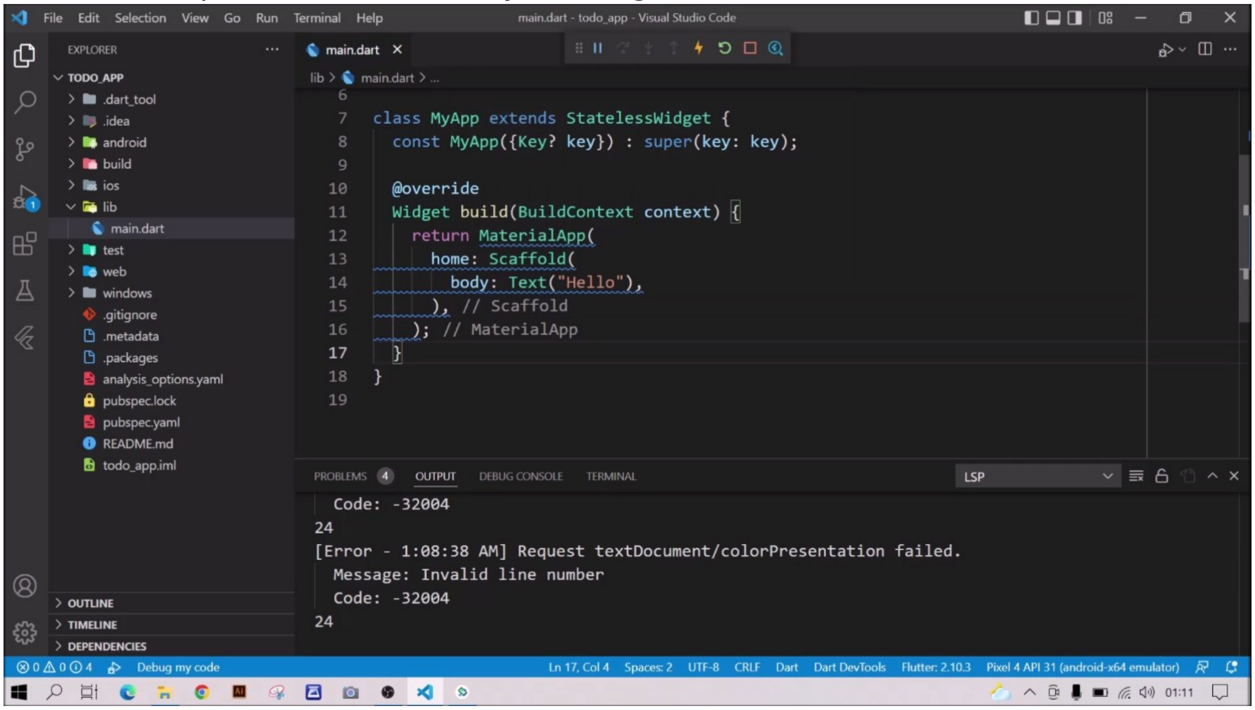
Kita memakai stl

Karna disini masih main

Stl MyApp



Disini menreturn material app
Dan home
Ini untuk tampilan sementara hanya testing



```
import 'package:flutter/cupertino.dart';
import 'package:flutter/material.dart';

void main() {
  runApp(myApp());
}
```

```dart
class myApp extends StatelessWidget {
  const myApp({Key? key}) : super(key: key);

  @override
  Widget build(BuildContext context) {
    return MaterialApp(
      home: Home(),
    );
  }
}

class Home extends StatelessWidget {
  const Home({Key? key}) : super(key: key);

  @override
  Widget build(BuildContext context) {
    return Scaffold(
      body: Center(child: Text("Tes")),
    );
  }
}
```
